

Pokémon Politics

Digital policy in the age of augmented reality

AR blurs virtual and physical dimensions. Is there still a separate cyberspace?

Does the registration of Pokémon domain names infringe **trademark rights**?

Is user location data managed with sufficient respect for **privacy**?

Is Pokémon Go good for **public health**?

Why do users in some countries have **access** and others do not?

Where and how can Pokémon Go be **taxed**?

Why do some consider the game politically or culturally **controversial**?

How will augmented reality change **education**?
